

Attention Roofers & Contractors

Badger Materials Recycling – Asphalt Shingle Recycling

Effective immediately we will not be accepting mixed roofing loads that are not sorted prior to delivery at our recycling plant. New rules are in place for accepting unsorted roofing loads. They are:

1. Roofing shingles with nails & tar paper shall be loaded into container first.
2. All garbage, plastic wrappers, bottles, or loose material shall be placed in garbage bags.
3. Metal items such as gutters or drip edge shall be placed on top of the shingles.
4. Plywood or wood sheets shall be placed on top of the metal.

Your help and cooperation is much appreciated!
